

# THE EMPRESS EXPRESS

VOLUME XVII, No. 47

EMPRESS, ALTA. THURSDAY, April 24, 1930

Price: \$2.00 Per Year.

## United Church

Church School, 2 p.m.  
Public Worship, 7.30 p.m.  
Text: "And they said one to another, did not our heart burn within us, while he talked with us by the way, and while he opened to us the Scriptures?"—Luke 24:32.

Special music will be rendered by the Choir.

A pageant will be given by the Senior Group of C.G.I.T. girls entitled, "The Risen King." The Junior Group will put on a pantomime entitled, "All Hail the Power of Jesus Name."

Service will also be held at: Leland, 2.30 p.m.

Special Prizes, 4.00 p.m.

"You can do what you want to do, if you want to do it hard enough to do it."

Rev. Geo. A. Shields, Minister.

## Castle Coombe Mission

Public worship will be conducted this Sunday at—  
Mayfield Hall, 11 a.m.  
Wainfleet 3 p.m.  
by the United Church student, Mr. R. Cameron.

## Hold Successful Easter Sale

The Women's Guild of St. Mary's Anglican Church, held a very successful Tow and Flower Sale on Saturday, Mr. W. R. Brodie was the winner of the quilt, which had been embroidered by Mrs. S. G. Clarkson, and was raffled.

## The Empress BAKERY

Get Your Bread, Cakes and Pastry from us.

Town Deliveries made if required.

Bread 10c a Loaf

**MURRAY**  
The Baker

## KODAK TIME

The Bright and Sunny days are here, and you will be bringing out your Kodak pictures of Spring scenes. Remember we carry a good stock of Photographic Supplies also we are ready to give you of good Developing Service.

Local agents for: Scott's Camera, Medicine Hat, Calgary, Saskatoon, Regina and Edmonton. We order from the nearest point.

**EMPRESS DRUG CO.**

## Spring Specials

We have on hand BULL DOG FANNING MILLS 24- and 36-foot BOSS HARROWS.

TRACTOR PLOWS, Disc and Mould Board.

HARROW CARTS and WAGONS and GRAIN DRILLS, and in fact every kind of a machine that you may want for Spring use.

Full line of all kinds of Eveners and Single Trees. IRONED. We carry all sizes of Everer Woods and Single Tree Woods. Call and see us.

LET US SHOW YOU THE

New Model L. and Model C. Case Tractors.

**The Empress Lumber Yards**  
J. N. ANDERSON, prop. PHONE 58

## Easter Picnic

The Little Beginners and Primary Classes of the United Sunday School were entertained at the home of Mr. and Mrs. Roy M. Rivers, on Good Friday, April 18, to an Easter Picnic. A number of the other Sunday School children were also present.

The following sports and games were enjoyed: Hunting for Easter Eggs, Children's Races (up to 6 years of age), Boys' Race, Girls' Race, Hunt for the Lone Lost Egg for Boys, Girls, and Hunting the Lone Lost Egg for Boys, Peanut Scramble, Hunting for Peanuts, Hide and Go Seek, Tag-o'-War. Plans were made for a supper to be served around camp fire, but owing to unfavorable weather conditions, supper was served in the house.

## Fuego Oil Co. News

A report from the Fuego Oil Co. says that gas from their No. 1 well is flowing steadily, but so far the oil is coming by heads. That is at times large quantities of oil is forced out by gas pressure, then it will stay quiet for a half to two hour period and flow again in good quantity. This can be checked and production increased by pumping. This may have to be done in order to get the best out of the well. The well is now connected to the tank; the last twelve hours of April 17th the well produced 31 barrels of oil.

All material possible is now being reclaimed from No. 1 to use on No. 2, but some new material will have to be bought. Mr. Chas. Knight, one of the geologists who passed through this field in the early eighties with the famous Dr. Dawson, claims to have located a stratum there at that time. He holds a 320 acre lease near to the well and intends paying a visit to the field in the near future.

Mrs. D. McEldhorn and Mrs. E. McGill are visiting in Calgary.

## High School Report to April, 1930

## To Parents and Guardians:

The Empress School staff disclaims entirely the responsibility for failures among Grade VIII, and High School students who persist in the ruinous practice of attending dances and other mid-week functions to the detriment of their studies. Neglect of home work is the seed of failure and is productive of sure disaster to the teen year old student, especially when coupled with the giddy whirl of social frivolities. Under no circumstances should any student be permitted to perform any less homework nightly than the amount set

Harold Boyd and Allan Van der Horst, were home for a brief visit, to spend the holidays with members of their families.

Miss Joan Moore, daughter of Mr. and Mrs. C. R. Moore, underwent an appendix operation this week.

Mr. and Mrs. J. Schellfeld entertained the former's parents, and sisters, from Youngstown during the holidays.

## FARMS FOR SALE ON EASY TERMS

The following Parcels are offered for Sale by Public Tender:

- W. 1/3-25-1 w. 4th, 2 miles East Arneson.
- N. 1/3-23-2 w. 4th, 3 miles North Bindloss.
- N. 1/3-27-1 w. 4th, 2 miles North-east Sibbald.
- N. 1/3-39-4 w. 4th, 5 miles North-east Excel.
- W. 1/2-25-2 w. 4th, 3 miles North-east Excel.
- E. 1/2-44-3 w. 4th, 3 miles North-west Bindloss.
- N. 1/2-7-3 w. 4th, 4 miles South Benton.
- S. 1/2-25-3 w. 4th, 4 miles West Acadia Valley.
- N. 1/2-1 w. 4th, 3 miles North Oyen.
- S.E. 1/4-24-1 w. 4th, 7 miles North-west Empress.
- N. 1/2-36-3 w. 4th, 6 miles North-west Acadia Valley.
- W. 1/2-61-3 w. 4th, 7 miles South-east New Bridgen.
- S.W. 1/4-20-2 w. 4th, 6 miles South-east Benton.
- N. 1/2 of N.E. 1/4 and S.E. 1/4-25-24 w. 4th, 3 miles North-east Excel.
- N. 1/2-30-4 w. 4th, 12 miles South New Bridgen.

Offers for any of the above farms are invited together with any suggested terms of purchase.

Send your offer in plain sealed envelope marked, "Tender for ... Of Sec. ... Rge. ... W. ... Mer. The highest or any tender not necessarily accepted. Tenders will be opened at Noon, April 28th, 1930.

**The Soldier Settlement Board of Canada**  
602 SOUTHAM BUILDING, CALGARY, Alberta

For Further Particulars apply to D. E. HOLLOWAY of CHINOOK, Alberta.

## WARNING ISSUED REGARDING SAWFLY

Farmers are being urged by the Dept. of Agriculture, Edmonton, to take immediate steps to combat the wheat stem sawfly which, it is feared, will make serious inroads upon the crops throughout a wide area this season, unless steps are taken at once to fight it.

It is advised that a strip, the width of a drill, be seeded at once around the outside of any field to be cropped. This strip, which will be earlier than the remainder of the crop, should be cut in the latter part of July, and will be found to be heavily infested with the pest. The remainder of the field will be comparatively free.

A survey of the province gives the boundaries of the area to be affected as from Chauvin, across to Viking, down to Camrose, south to Drummeller and Brooks, and east to Empress. Within this line, it is said that farmers must take prompt action in order to combat threatened disaster.

In advising the farmers, the Department states that a strip of land around each field, the width of a drill should be seeded at once. The earlier this strip is seeded, the more effective it will be in the remedy. This strip of land will be much earlier than the remainder of the crop, and should be cut in late July.

## Easter Monday's Service

The Women's Missionary Society hold their Easter Thank offering Service on Monday afternoon, April 21.

The meeting was presided over by Mrs. R. L. Arthur, the president.

A printed program was followed during the first part of the service. It contained appropriate portions of the Scripture for responsive reading, selected hymns and prayer. The Senior Group of C.G.I.T. girls then put on a pageant entitled, "The Risen King." This was followed by an inspiring reading by Mrs. Leslie Shannon.

The concluding part of the service was a pantomime provided by the Junior Group of C.G.I.T. girls, entitled, "All Hail the Power of Jesus Name." After which the audience arose when the benediction was pronounced by the Minister.

The congregation then proceeded into the Sunday School rooms where they were served a hearty lunch and had a social time before leaving for home.

## Call For Tenders

### Municipal District of Acadia

Sealed Tenders will be received by the undersigned up to 12 o'clock noon on Saturday, the 2nd day of May, 1930.

For grading approximately 40 miles of main to government standard.

For particulars apply to—  
E. M. GILMAN,  
Secretary-treasurer,  
Acadia Valley, Alberta.

## EMPRESS THEATRE

## Liquor Bill And Divorce Court Measure Faces Parliament

Ottawa, Ont.—Parliament faces a momentous week. Two important pieces of legislation—the Liquor Bill, and possibly the Ontario divorce court measure—may go through the House of Commons and be passed on to the Senate before the week terminates. Division on a sub-amendment calling for abrogation of the Australian trade agreement is another likely development.

In government circles the apparent desire is to clear desks as far as possible for the bringing down of the budget a few days before the Easter recess beginning on April 1.

The bill to stop the granting of licences to vessels carrying liquor to the United States will again come up in committee of the whole. Constitutional aspects of the bill, with the problem, and details of the measure undoubtedly will be discussed.

There is no reason, though, to think that the measure will be delayed in the Commons, and no surprise would be occasioned if it were given third reading and sent to the Senate.

This week will see the Ontario divorce bill again in the Commons. At present, the measure is encountered with an amendment by Thomas McMillan (Liberal, South Huron). Rather lengthy in verbiage, the crux of the amendment is that a campaign of education should be conducted to combat the "growing evil" of increasing divorces. The probability of the bill receiving approval this session is increasing although there is always the possibility that its passing in the House might be delayed.

In corridor gossip over the weekend, there is a suggestion that no provision might be incorporated to the effect that the legislation for a divorce court may not be taken into operation until approved by provincial legislation or order-in-council.

The Australian trade agreement will likely be brought into discussion by Robert Gardiner (U.F.A., Acadia). Mr. Gardiner has a sub-amendment which passed on division early last week. In brief, the amended amendment calls for the superceding of an order-in-council granting the same concessions to New Zealand as had been given to Australia by duly executed agreement. The U.F.A. leader wants to go further, and it is understood, he will ask for abrogation of the agreement with Australia.

### Bar Russian Wheat

London, England.—The British steamer "Confidante" with a cargo of Russian grain bound for Rotterdam, was docked at Amsterdam because of a Dutch protest against the import of Russian produce, which members of the Netherlands agricultural board said had been sold from Russian farmers by the Soviet government.

## Want Imposition Of Higher Duty On Foreign Eggs Entering Canada

Ottawa.—Canadian hens produce the finest eggs in the world, but heavy seasonal imports of eggs from the United States are disturbing the serenity of their owners. The question of restricting imports increases the tariff on eggs was argued before the Advisory Board on Tariff and Taxation, when the Application of the Canadian Poultry Pool, Limited, was heard.

The applicants asked for a duty of 9 cents a dozen on all foreign shell eggs entering Canada. This does not comply with the specifications of Canadian extra. The Canadian extra, it was pointed out, was of such a high standard that no competition from abroad was feared. At the same time it was urged that the present fixed duty on frozen eggs entering Canada should be at least maintained. The latter enter at an ad valorem duty while the duty on shell eggs is 3 cents a dozen.

The question resolved itself into whether the remedy proposed would have the desired effect. In a letter from the Canadian Council of Agriculture it was urged on the basis of the imposition of a higher duty would only have the effect of stimulating production in Canada with a

### Passing Of Great Statesman

Lord Balfour

Woking, Surrey, England.—In a room of his brother's house, looking out to the peaceful English countryside he loved so much, Lord Balfour passed peacefully away.

He was a former prime minister of Great Britain and one of the last of the great Victorian statesmen. His last act was characteristic of his whole life.

Sending for his man-servant, James Colman, who had been in his service 30 years, Lord Balfour took his by the hand and said:

"Good-bye, James. Thank you very much for all you have done for me."

Lord Balfour was 82 years old. He was created an early and Viscount of Balfour after the Washington conference in 1919, and will be succeeded by his brother Gerald, in whose house he died.

The funeral was held at Lord Balfour's Scottish home at Whittingham.

Premier MacDonald, informed of Lord Balfour's death, declared: "It is the end of a long, useful life, and the whole nation will unite in expressing its regret and in paying its tribute."

The Earl was 81 years old last July, and he played tennis right up to that time. A most notable characteristic was an almost unlimited capacity to remember. He frequently astonished friends with recollections of the most trivial incidents in his long career.

### Restrictions Raised On Reindeer Meat

Limited Supply Can Be Imported Without Import Duties

Ottawa, Ont.—Reindeer meat may now enter Canada without restriction, under the provision of an order-in-council just issued, on the recommendation of the Department of Agriculture. Up to the present time it was required to conform to the inspection requirements of other meat products but owing to the inaccessibility of reindeer herds in the remote sections of Alaska inspection conditions are as difficult as to be impracticable.

Limited supplies of reindeer meat will under the new regulation, shortly appear in Canada through the cold storage terminals in New Westminster, B.C.

### Radio System For Police

Winnipeg.—To stamp out crime wave, Winnipeg police plan to establish radio system for detection and prevention of crime with radio-equipped autos and out-lying police stations. The cost is estimated at \$30,000, ultimate cost, \$100,000.

Owing to climatic conditions in Canada there was always a very heavy production during the summer months and eggs had to be stored at considerable expense for winter use. The only production of any account during the winter months in British Columbia and it was claimed, eggs from that province were being forced to compete with the eggs from the markets of eastern Canada from Chicago.

Another hearing is likely to be held.

### Airmen Reach Churchill

Vance and Bladale, Marooned In North Since Last October

Churchill, Man.—J. D. Vance, pilot for the Northern Aeromarine Explorations Limited, and his mechanic Bladale, who were marooned in the far north many months ago, have reached Churchill. They had flown 500 miles from Baker Lake, aerial station, and were accompanied from Chesterfield Inlet by "Red" Williams, the Northern Aeromarine Exploration Company. The airmen were guided by two Eskimos, and had a dog train of three teams.

Despite the arduous tramp to the Bay Port, the airmen and their companions were in excellent health. With train service suspended to Churchill for the winter, the men still have a "walk" of more than 100 miles to reach Mile 327 where they can board a train for The Pas.

Participating in the aerial search for Col. C. D. H. MacAlpine, president of the Dominion Explorers, Limited, and his seven companions who were lost in Canada's north Arctic regions for nearly two months, Vance and his companion were forced out of the hunt last October.

A mishap to their plane after the MacAlpine rescuers headed northward, left them stranded at the isolated aerial post of Baker Lake.

Waiting favorable weather and trail conditions, the men suffered no hardship at the post, where there was a plentiful supply of provisions and also a Hudson Bay trading post.

After an unsuccessful start in December, the airmen waited another month and on January 2, accompanied by Indian guides with dog teams, set out on their journey.

After resting for a short time, they took to the trail that brought them to Churchill recently. In December the men were on the trail for two weeks, but fierce northern blizzards forced them to return to Baker Lake.

Vance, a veteran aviator, is a resident of Toronto, while Bladale, a youth of 21, is a Winnipeg boy, an experienced pilot and air engineer.

### Germany Raises Wheat Duty

And Government Has Power To Raise It Further

Berlin, Germany.—Food Minister Dietrich has completed negotiations with the government parties concerning new duties on agricultural produce and passage of the new schedule is regarded as assured. The duty on wheat is to be raised to a possible maximum of 120 marks (about \$28.80) a ton instead of 65 marks. The government will be authorized to raise it still further in case a sudden crisis should develop if huge quantities of wheat now stored in Canada and the United States should be thrown upon the open market. Under the measure the duty on barley would be raised to a hundred marks a ton.

Had Narrow Escape  
Cochimbo, Chile.—An automobile plunged into a 90-foot ravine near the town of Andali, turned over at least 12 times and crashed to a stop at the bottom—and none of the seven occupants was killed. Six were seriously injured and the other, a 4-year-old girl, slightly hurt. The motor car was demolished.

### YOUNGEST ADMIRAL

Rear-Admiral Gordon Campbell, V.C., D.S.O., youngest admiral in the British navy and first commander of the mystery ship, who is visiting Canada.

### India's Agitators Have Further Grievance

British Medical Council Refuses To Recognize University Degrees

New Delhi, India.—India's agitators have been given another opportunity to foster indignation against Britain by the curt refusal of the British Medical Council to recognize medical degrees of Indian universities.

British medical authorities have long been dissatisfied with the training methods of certain universities in India.

Many efforts have been made to achieve a degree of training which will win the approval of the council and enable Indian doctors to practice in Great Britain. The latest proposal, accepted and sponsored by the Government of India, provided for the appointment of a commissioner to ensure uniform training throughout India. The Legislative Assembly, however, rejected the plan and not long after the assembly's action the medical council refused to recognize Indian degrees.

### Recognition Is Refused

Bill Of B.C. Druggists Healers Was Rejected By Legislature

Vancouver.—On a point of order, upheld by Mr. Speaker Jones, the "druggists' bill" had hope of legal recognition by the British Columbia legislature this year, was killed. The Speaker ruled that their "compulsory" measure largely covered the same purpose as their original bill which was rejected by the private bills committee.

A. M. Manson, Liberal, Okanogan, has introduced another bill, raised the point of order.

Seize Fish Steamer  
Norfolk, Va.—The British oil screw steamer "Dorothy" and "Aulrey" was taken to Charleston, S.C., in company with a coast guard patrol boat, the crew of which had boarded the vessel and discovered 800 cases of liquor in the hold, a report from Charleston indicated.

### Winter Lures This Lady

Midwinter in the Metamora region with deep snow and sub-zero weather proved too great an attraction for Lady Kitty Ritsen, daughter of the Earl of Arlre, to pass up and she took Canadian Pacific train from Montreal to get there. An outdoor sportsman all her life, she here resolved her desire to be attuned to the great solitudes and the real nature. She fished through holes in the ice and picture shows what kind of sport she had. She behaved her dog in the snow when the day was done she retired to rest in a log cabin made snug with stove against the bitter blast. Her ladyship says that she prefers Canada in winter to summer and certainly her adventures seem to prove it.

## Naval Conference Reports Little Progress During the Past Week

### Millions For Highways

Manitoba Good Roads Program Calls For Large Expenditure This Year

Winnipeg, Man.—The good roads program for Manitoba this year calls for an estimated capital expenditure of \$4,000,000, the largest in the history of the province.

Hon. W. R. Chubb, Minister of Public Works, outlined the program before the legislature recently.

The estimate is made up of \$2,000,000 in unexpended balance and receipts, and \$2,000,000 in the new capital vote. In addition there is a special estimate of \$200,000 for the purpose of extending the Trans-Canada highway to the Ontario boundary.

Premier John Bracken informed the house that no road connecting with The Pas would be built this year, but that the government was pledged to build a road extending 30 miles to the Saskatchewan border as soon as Saskatchewan built the road from Hudson Bay Junction to connect with it. This road would form part of the proposed highway to Making.

### To Visit Canada

Train Of Fifty British Riflemen To Complete Here Next August

Ottawa, Ont.—A team of fifty English riflemen are expected to complete this August to complete in the Dominion of Canada Rifle Association matches at Carleton Place.

The party will be composed of competitors at the Bisley meet who can arrange to take the trip to Canada at their own expense. At the last D.R. meet, a number of cadets from the English public schools, members of the Officers' Training Corps, completed the policy matches. A similar representation from the O.T.C. is expected this year. These arrangements were made at the annual meeting of the D.C.R.A. which opened here.

### Retain Canadian Nurses

Found Impossible To Replace 103 Nurses In Detroit Hospitals

Winnipeg, Ont.—Possibility that Canadian trained nurses, not citizens of United States, may be retained in service of the city of Detroit, in two hospitals, appeared at a meeting of the Detroit common council.

The council was advised by Dr. Carl E. Buck, of the board of health, that it is found impossible to replace 103 nurses who would be discharged under the policy adopted by the council, despite the fact that advertisements had been sent to all parts of United States.

### Canada's Power System

Ottawa, Ont.—In 1928 Canada had 18 hydro-electric power systems discharging more than 100,000,000 kilowatt hours or more. The Hydro-Electric Power Commission of Ontario had an output exceeding four billion kilowatt hours each. These 18 systems account for 92 per cent. of the total units generated in all central power systems of Canada.

## Agreement For Return Of Saskatchewan Resources Has Been Signed

Ottawa.—The agreement for the return of the natural resources to Saskatchewan has been signed.

In Ottawa, Hon. Ernest Lapointe, Minister of Justice, and Hon. Charles Stewart, Minister of the Interior, affixed their signatures to a copy of the agreement, while in Regina Premier J. T. M. Anderson, and Hon. M. A. Macpherson, attorney-general, were to have signed.

The copies were then mailed from Ottawa to Regina and from Regina to Ottawa. The completing signatures will be affixed when they will return their destinations and the agreement will then be made public.

With the signing of the agreement the Saskatchewan resources, announced at Premier King's office, the return of natural resources to the western provinces is complete. Agreements have

London, England.—The naval conference remains stranded on the shores of the French demand for a big naval tonnage and the Italian claim for parity with the leading continental power, which is now France.

Another week of discussion and conversation ended in deadlock and uncertainty.

Now and again, as the delegates hold their conversations at No. 10 Downing Street or at their own headquarters, a ray of light strikes through the gloom. Almost immediately the sky becomes overcast again with an intimation there is no way out of the impasse.

The delegates there have been a definite rupture. They are all hoping a solution of the difficulties will be found. They point out that other conferences have met situations equally difficult, and have yet reached no success. But the general atmosphere surrounding the naval conference two months after it had opened was one of depression.

Both at conference headquarters and at the foreign office, it is stated no notification had ever been received of any such intention on the part of the French delegation that such notification would be necessary in the usual course of things, it was said.

In real results the situation is little changed from what it was when Premier MacDonald, Premier Tardieu and M. Briand met at London in the week ago. As the days pass, the rumors multiply. The common remark among experienced conference observers is that the chances of a full five-power agreement are virtually gone, that the best to be hoped for now is a three-power agreement by Britain, the United States and Japan.

But a three-power agreement, naval men know, might offer special difficulties to Britain in view of her dependence on the seaways for her food supplies. And with the increasing rumors there is a growing uneasiness in British political circles. Rt. Hon. David Lloyd George has said he would not sign a three-power agreement if it meant the loss of the sea.

Minneapolis, Minn.—Spending 19 years at the University of Minnesota and earning three degrees, Thomas Rigor of the Philippine Islands, has been elected to the senate of his country. The doctorate degree was awarded to him for his work in the ready has earned degree of bachelor of arts and master of science.

### Want Smarter Uniforms

London, England.—Smarter uniforms for the army were urged by one member of the House of Commons when a questioner brought last year's decline in recruiting to the attention of the House. Another parliamentarian advanced the idea that the whole army should be put into kilts as a means of attracting the favorable eye of youth.

## Agreement For Return Of Saskatchewan Resources Has Been Signed

Ottawa.—The agreement for the return of the natural resources to Saskatchewan has been signed. In Ottawa, Hon. Ernest Lapointe, Minister of Justice, and Hon. Charles Stewart, Minister of the Interior, affixed their signatures to a copy of the agreement, while in Regina Premier J. T. M. Anderson, and Hon. M. A. Macpherson, attorney-general, were to have signed.

The copies were then mailed from Ottawa to Regina and from Regina to Ottawa. The completing signatures will be affixed when they will return their destinations and the agreement will then be made public.

With the signing of the agreement the Saskatchewan resources, announced at Premier King's office, the return of natural resources to the western provinces is complete. Agreements have

## Value of Canada's Dairy Products Now Closely Approximates the Value of Our Mineral Production

In a comprehensive report for the year 1928, on dairy factories in Canada, just issued by the Canadian Government Bureau of Statistics, some interesting information on the dairy industry is given. The value of all dairy products for the year reviewed is estimated at \$297,625,347, of which creamery butter accounted for \$64,702,538; dairy butter, \$29,103,000; factory cheese, \$30,494,681; home-made cheese, \$82,000; miscellaneous dairy factory products, \$20,581,490 and milk, \$36,117,568 gallons, valued at \$12,661,856. The report states that the per capita consumption of butter in Canada is 29.66 pounds, said to be the highest in the world.

The value of Canada's dairy products in 1928 was only about \$10,000,000 less than the total value of the mineral production of the Dominion last year.

The dairy industry in Canada dates from 1608, when Samuel de Champlain, the famous French explorer, whose name is prominently identified with the earlier history of Canada, brought a small number of cattle from France to the Saguenay, Quebec. Cattle were introduced into Aetna, now Nova Scotia, in 1632. The first exports of dairy products from producers to the United States date from 1810. The first Canadian cheese factory was established in Ontario in 1841, and the first creamery in Canada for butter making was opened in Quebec in 1873. There are now 2,633 dairy factories in operation in Canada of which 1,216 are creameries, 1,301 cheese factories, 287 combined butter and cheese factories and 29 cooperatives. The number of farmers who supply milk and cream to these factories totals over 280,000.

### Would Be Interesting Work

#### Testing Out New Flower Varieties For Garden Plot

Have you a trial garden plot reserved for the testing of floral novelties and novelties? You are missing some of the fun of growing flowers if you haven't. It is said that nature is the spice of life and the flower world is full of novelties.

Every year brings its new introduction in floriculture. They are featured in the seed catalogues and in the magazine advertisements. Some of these novelties may be worthy of more or less permanent places in your garden; others may not be. The best way to learn which have merit and which have not is to test a few each year. The cost will not be prohibitive and you will be well repaid the expense in the amount of enjoyment you will gain. Go over the lists of new things and select three or four that particularly appeal to you and buy small packages of seeds from reliable firms.

Plant the seeds in a space in your garden specially reserved and prepared for such purposes and follow cultural directions carefully. In other words: Give the novelties a fair trial. Your interest in your trial plot will grow with the plants and you will await, with no little impatience, for the first blooms to appear.

#### Made Him Too Good

Jimmy, the little boy next door to us, was sitting on our front porch looking very lonesome.

"Where's your little playmate Ellie?" I inquired.

"Aw, he got a spanking this morning and he's always so good for a while after that I have to play by myself," was the disgusted reply.

Mother: "Eric dear, don't go too far out in the water."

Eric: "But mother, Daddy's a long way off."

Mother: "I know dear, but your father has his life insured."

### Insect War Resumes

#### Entomologists Using Means To Combat Ravages Of Insects

A mighty army of miles, wages countless warfare on all forms of plant life and just as ceaseless is the warfare waged by skilled entomologists to protect and preserve farm, field and garden crops. Experts of the Dominion Department of Agriculture have already planned intensive campaigns against field crop pests for 1929, including grasshoppers, the wheat stem sawfly, wireworms, the pale western cutworm and his ally the red-necked cutworm, the borlha armyworm, the early cutworm, the Colorado potato beetle, the imported cabbage butterfly, and the root maggot. They also have a watching brief against the forest pests, including the spruce sawfly, the forest tent caterpillar and the box elder leaf roller and twig borer.

The Publications Branch of the Department of Agriculture have much interesting information in bulletin form dealing with these and other insect pests.

The jacket dress is one of the most important items for Spring. The model illustrated is one of the best I've seen. It will serve for sports, spectator sports, or afternoon, according to the fabric selected.

It is charmingly flattering in black silk crepe. The long-waisted bodice of the attractive dress has an inset at front of eggshell shade crepe accented by black bow and piping. The eggshell crepe also lines the jacket and appears in collar and rear facing. The dress may be made with or without sleeves.

For sports and street, it is very conservative in trend of lightweight in brown and white colouring in contrasting shades designed to flatter.

The inset of dress of harmonizing brown plain wool is repeated in jacket lining and facing.

For Spring, printed silk crepe in new shades of green tones with plain green crepe, independence blue silk crepe with eggshell red and white chiffon and purple wool jersey with orchid fallie crepe are stunning selections.

Style No. 3234 is designed in sizes 10, 12, 14, 16, 18, 20, 22 and 24 inches bust.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Fashion Department.

### R. A. C. HENRY

who has been appointed Deputy Minister of Railways and Canals to become Vice-President and General Manager of the Beulahs Hotel, Heat and Power Company. Mr. Henry was formerly Director of Economics of the Canadian National Railways. As Deputy Minister of Railways he had a place on the Board of Directors of the National System and he will remain on the Board, where his intimate knowledge of the affairs of the company will be of the greatest value.

### Real Mummified Wheat

Professor Says Seed Which Sprouts Is Not Genuine

Professor Meichers, agricultural biologist of the University of Saskatchewan, who spent two years in the Nile Valley investigating plant diseases at the invitation of the Egyptian Ministry of Agriculture, has in his possession what he is positive is genuine mummified wheat. It was taken from the pyramids and is believed to be 5,000 years old.

The professor said supposedly mummified wheat which has sprouted is not genuine but is a fake seed which has been colored and made to appear as mummified grain and then sold to tourists.

The ancient wheat in his possession has the shape of the ordinary kernel but is red in color, due to oxidation during the centuries it lay in the pyramid of Sakkara. Under slight pressure the grain turns red.

### Many Countries Bought Foxes

2,558 Animals Shipped From Prince Edward Island Last Year

Live foxes shipped to foreign countries by express from Prince Edward Island, Canada's smallest province and known as the "Garden Island," during 1928 shows a considerable increase over the preceding year. Last year 2,558 animals were shipped as compared with 507 shipped in 1927. Germany was the largest importer, taking 759 animals; Norway took 305; United States, 375; Sweden, 669; England, 142; and Russia, 131, while France, Holland, Finland, Belgium, Scotland, Czechoslovakia and Labrador also imported live foxes. Other provinces of Canada bought 3,731 Quebec taking 2,429.

### Experimental Farms

There are now 28 experimental farms under the Dominion Government, four of them being in Quebec province, six in British Columbia, four each in Alberta and Saskatchewan, three in Ontario, two each in Manitoba, Nova Scotia and Prince Edward Island, and one in New Brunswick.

### Coke Production In Canada

Coke is being produced in Canada chiefly by the treatment of bituminous coal; a small production is also obtained from the distillation of petroleum. Coke derived from the treatment of coal or petroleum is now produced in almost every province of the Dominion.

The Alaskan coast-line is longer than the distance round the earth.

### LOVELY RESTING PLACE

The remains of the Carl Ben Eklund aeroplane as it was found on the coast of Siberia after weeks of fruitless search under adverse conditions.

### Traveller's Tales

#### Interesting Facts Related To New York Newspaper Man

Wm. M. Myers, who conducts a reliable hotel news column for the New York Evening world called "Inns and Outs," said in a recent issue:

Things travellers tell me: That Bologna, Italy, is an older city than Rome. . . . That Lake Tanganyika, Switzerland, resembles a cross with a broken stem. . . . That the tyrant of New Spain, the Viceroy, is the largest of all song birds and can bark as well as any dog. . . . That Aleppo, a city in Syria, is built over an ancient city that was swallowed up by an earthquake a century ago. . . . That the Gulf of Lyons in the Mediterranean, was named for the lion because of the violent gales and storms to which it is subject. . . . That the adjutant bird found in tropical India is sometimes 6 feet tall and can easily swallow a cat, a chicken or even a leg of mutton whole. . . . That Mardi Gras means Wednesday. . . . That San Diego is the oldest city in California. . . . That the Philippine Islands number 3,000. . . . That the famous Italian painter, a solitary dog in the Pacific, between Australia and South America just two square miles in area, is inhabited almost entirely by descendants of the mutineers of an English Government ship. . . . That a mummified cornucopia is found in a flower. . . . That the lynx, one of the most terrifying of animals, is really a cat. . . . That Vevey, Switzerland, is built in a triangle. . . . That the strawberry is really a distant member of the rose family. . . . That the flagpoles birds you see in the zoological parks have lost their bright colors, the ones in Louisiana and Florida being rose-colored and bright red. . . . That Incahuasi, the name of thirteen peaks. . . . That Kansas is larger in area than New York and Maine put together. . . . That Holland is less than 200 miles long and only 110 miles broad.

### Ignorance Of One's Country

Long ago, Rudyard Kipling wrote: "What do they know of England who only England know?" There is a wide meaning to that phrase, but there is no admiring large proportion of Englishmen who know little about their own country.

There is an extraordinary fact that the average Englishman has never visited the most famous shrines of English glory. There are hundreds of thousands, perhaps millions, of Londoners who have never visited the most historic memorial of all—the Tower of London. There are vast numbers who have never seen inside Westminster Abbey or St. Paul's cathedral, although they may pass these buildings every day of the week. Just because these places are part of the daily panorama they simply accept their existence and never give a thought to what they represent.

It is those places which tourists from abroad deliberately go to see. They have planned their tours years ahead, and the ultimate visit is the fulfilment of their dreams. The visitors' books at Shakespeare's residence, the church at Stoke Pogson, the shrine of Gray, the poet who wrote his immortal "Elegy in a Country Churchyard," contain pages and pages of names of people from many places—but seldom one from London or Glasgow.

Proximity creates a sort of familiarity that breeds indifference. What goes for England in this respect also goes for Canada.

### Would Be Easier

"Maybe I'll be a preacher when I grow up," asked the small boy.

"Of course you may, my pet, if you want to," his mother replied.

"Yes I do." I suppose I've got to go to church all my life, anyway.

It's a good deal harder to sit still than to stand up and holler."

### As He Likes It

Just another tourist is the way the African natives treat the Prince of Wales, on his way to his hunting grounds. The Prince stopped at Mafeking, Bechuanaland, and strolled with friends along the platform chatting. He was recognized by all the white people, but the aboriginal natives merely treated him as some one who might purchase skins, necklaces and carvings.

Grandmother—"I suppose you think this old farmhouse is a real small dear, after being in the city so long?"

Little Betty—"Small, grandma? Haven't you ever seen a kitchenette?"

Sunday School Teacher: Now, Nettie, what does it mean to bear witness against one's neighbor?

Nettie (aged 7)—It's when nobody ain't doing nothing and somebody goes and tells it.

Grandmother—"I suppose you think this old farmhouse is a real small dear, after being in the city so long?"

Little Betty—"Small, grandma? Haven't you ever seen a kitchenette?"

Little Betty—"Small, grandma? Haven't you ever seen a kitchenette?"

## County Health Unit Plan For the Better Protection of The Health of Rural Canada

### When To Plant

#### Best Time To Plant Vegetable Garden Having Regard To Classification Of Seed

The perennial problem of when is the best time to plant garden crops has again come around. An interesting and useful guide in this direction is furnished by the Central Experimental Farm of the Dominion Department of Agriculture. Flower can be set out quite early, but "The safest guide as to the proper time to plant vegetables is first of all to divide the various crops into groups. The first group comprises those that are considered hardy or able to withstand very cold conditions; those that are semi-hardy and must be planted when conditions are more favorable; and lastly those that are very tender, requiring warm, moist soil and ideal seasonal conditions for their proper and normal development."

"Those that fall in the hardy group are onions, snow peas, radishes, radish and turnip. The average date of early planting of seed of these hardy crops in the division of horticulture, Central Experimental Farm, Ottawa, has been found to be the first week in May."

"In the second or semi-hardy group we find cabbage, cauliflower, beet, carrot, lettuce, parsnip, and wrinkled peas. The plants of cabbage and cauliflower can be set out quite early, but they must be well hardened off so that they will withstand quite low temperatures."

"The third group which includes beans, celery, corn, cucumber, melon, pumpkin, squash and tomato should be planted until settled weather conditions have arrived. The soil must be warm and moist thus giving quick uniform growth. The best time for planting these crops is from the end of the third week in May until about June 10."

### Record Of Performance

#### Report Of Record Of Performance For Pure-Bred Dairy Cattle For Past Three Years

Dairymen throughout Canada will be particularly interested in the twenty-first report of the Canadian Record of Performance For Pure-Bred Dairy Cattle, covering the years 1927, 1928 and 1929, issued by the live stock branch of the Dominion Department of Agriculture.

The report contains a detailed record of every animal whose record was such as to merit being placed on the honour roll up to November, 1929. Individual records are listed by class and breed, and are readily available to the individual through an index to owners.

Complete details as to standards and regulations are included in the report.

### Not Much For Surplus

#### Railway-Earned Dollar Has To Be Spent Many Ways

A typical railway-earned dollar would be split many ways, before the numerous demands upon it are satisfied, a recent analysis of the average "dollar" earned by Frisco lines during 1929 reveals. Forty-three and a fraction cents out of the dollar goes for labor, almost 6 cents for fuel, more than 14 cents for material and supplies, 5.65 cents for taxes and 13.61 for interest, while rentals, personal injuries, loss, damage and depreciation take another 7 cents.

The balance, 10.38 cents, is left for dividends and surplus.

Grandmother—"I suppose you think this old farmhouse is a real small dear, after being in the city so long?"

Little Betty—"Small, grandma? Haven't you ever seen a kitchenette?"

Just a few days ago, the Canadian House of Commons made a remarkable thing. Without division it approved a motion requesting the Government to consider the health of rural Canada, in order that the health of rural Canada might be given better protection.

The gigantic scope of such a project at first eludes one, as does the great significance of the fact that by approving the motion without division, the House put the question of national health where it belongs—out of the field of party-politics.

This is extremely fortunate, for it enables every Canadian citizen to discuss, and to give his approval without any consideration of party affiliations to what is probably the greatest piece of health-legislation ever contemplated in the history of the world.

For the County Health Unit scheme, when it is in working order throughout the Dominion, as it is bound to be eventually, and as it already is in parts of Quebec, Saskatchewan and British Columbia, will save Canadian lives much less than the Canadian dollars than the majority of us realize are now being wasted. There is no doubt that future generations will look back upon our present rural health management with horror, as being little short of criminal.

At the beginning of this century, the country was a healthier place to live in than the city. In fact, most of our fathers will probably be surprised to learn that it is so no longer. Actually official statistics prove that the country is much less healthy than it was in the days of our fathers, and the reason is simply that the city man's health is looked after scientifically, by modern, up-to-date public health departments, while the farmer, and the small-town dweller, do not look back upon this advantage because it costs a great deal of money, and the country and the small town cannot afford it.

The County Health Unit Plan, providing as it does, for Federal and Provincial payment by subsidy of one-third of the cost of each County Health Unit, the municipality serving, paying the third, recognizes and acts upon the fact that health is a national asset, and that rural lives are as valuable to Canada as urban ones.

Surely this is eminently sound on practical as well as humanitarian grounds. Everyone, regardless of political affiliations, agrees that Canada, supporting social machinery capable of serving more than double her present population, needs people more than anything else in the world. We seek and are willing to pay for immigrants of the right kind. Yet every year we lose rural-born, native Canadians by the thousands, years ahead of their time, through diseases which could be entirely eliminated, for example, diphtheria and typhoid, both of which are preventable and could be wiped out within a generation, through tuberculosis, heart disease, complaints peculiar to infants and children, scarlet fever, and so on, despite the fact that proper measures of public health can save and in some centres are annually saving many lives from all of them.

Quebec has attacked this problem. She has 17 rural health units in operation, and expects soon to have eight more. Consider what happened in Beauce County, Quebec, following the organization of such a unit in 1928.

In 1928 there were 643 deaths in the district from general causes. In 1928 this figure dropped 150 to 493. Similarly, infant deaths were reduced from 213 to 100; deaths from tuberculosis from 56 to 51, and deaths from contagious diseases from 96 to 27.

Continguous, indicating the reduction of disease generally are not yet available. The study of the death-rates makes likely the assumption that this too, must have been comparatively important.

Postal Clerk (trying to get description of the sender from the payee of a money order):

"What's his Christian name?"

"He's 'hant got one. He's a Jew."

## WORLD HAPPENINGS BRIEFLY TOLD

The newspaper Excelsior, one of Mexico City's leading dailies, has announced it will practically eliminate crime news from its columns.

R. H. Ten Shaw, secretary of the state for war, told a questioner in the House of Commons that no British officer was shot for cowardice during the Great War.

President Hoover worked for the state of Arkansas, on a mineral survey, in 1903, at a monthly salary of \$40, records of the state geologist department show.

Locusts have created a grave situation in Jerusalem, and several immense swarms which have recently appeared in the vicinity of Jericho have brought a fresh menace.

Colonel Gustavo Leon, of the Mexican air force, is rapidly going ahead with plans for a one-stop flight from Mexico City to Paris, with New York as his intermediate point, early in May.

Fire sweeping through Sheritt, Gordon Mining Company boarding house at Sheritt, destroyed a \$20,000 structure, burned to death George McKenzie, aged 38, a mine worker, and seriously injured three men.

An official announcement says that 56 churches in Moscow and vicinity would be closed "upon demand of the people and public organizations." This is the largest number of churches ever closed by the Soviet government at one time.

At a meeting in Toronto, of Ontario members of the Canadian Press, proposals of the management for improving the character and volume of the service, particularly the supplying of a more intensive Canadian domestic coverage, were unanimously approved.

## NERVES WERE BAD

Could Not Sleep

Tired All Day Long

Mrs. Florence Coulter, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long."

A neighbor came in to see me, one morning, and advised me to take

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## A Gateway to the North

Lakes and Waterways in the Aluring Hinterland That Lead To The Arctic Ocean

Prince Albert National Park in the province of Saskatchewan promises to become the most-frequented gateway to the waters of this alluring hinterland of Canada as yet so little known. Beyond park boundaries, to the north, west, and east, lie a succession of lakes and waterways, extending like the links of a silver chain, for literally hundreds of miles; on the northwest, finally reaching the waters of the Par North and the Arctic Ocean, and on the east, Hudson Bay.

Mrs. Pester: Are you sure this is a thoroughbred Boston terrier?

Mrs. Pester: Reasonably sure. Why?

Mrs. Pester: Cause I tried him with a plate of beans and he turned up his nose at them.

## Makes Museum Thief-Proof

Super Burglar Alarm System Protects Metropolitan Museum in New York

Installation of a super burglar alarm system in the New York Metropolitan Museum of Arts with its priceless treasures has made this famous institution "thief-proof." It is believed by the museum trustees and the engineers who perfected the system.

Not only is the museum protected against actual theft, but any attempt to molest the treasured objects would result automatically in impromptu the vandal within the walls of the museum.

According to authentic information, the system recently installed works like the nervous system of a human body. The instant anyone disturbs any of the protected objects, the electric "nerve" records in the "brain centre" the exact point of trouble and also automatically sounds the alarm. This alarm is given through the medium of a galvanometer on the switchboard in the "watch room," where operators are on a 24-hour vigil. The galvanometer tells exactly where the attempted theft is taking place.

This is followed simultaneously by the signals of an automatic system of sirens placed secretly in various wings throughout the museum. They in turn notify a trained staff of about 20 guards kept on duty at strategic points.

(By Annabelle Worthington)

There is a man who first invented the Ereton fisherman's petticoat as he put out to sea, "Oh, God, do Thou help and guard me; the sea is so wide and my boat is so small!"

And who was the poor dame who, when questioned by a kindly bishop, held up her dry crust and said, "I have all this, and faith!"

And there are, of course, all the unknowns whose words are sung and said around the world and will not pass away.

## Unknown History Makers

Hundreds Whose Words Live, Have Always Been Nameless

There are hundreds of people whose names we do not know, though their words have passed into history. "There is the nameless, well-dressed woman, walking by Loch Kathrine one fine evening, observed, 'What, you are stepping westward?'" she gave the poet the idea for his poem, "Stepping Westward."

There is the watchman who passed under Pepp's window crying, "That one of the clock, and a cold, frosty morning!"

There is the man who first invented the Ereton fisherman's petticoat as he put out to sea, "Oh, God, do Thou help and guard me; the sea is so wide and my boat is so small!"

And who was the poor dame who, when questioned by a kindly bishop, held up her dry crust and said, "I have all this, and faith!"

And there are, of course, all the unknowns whose words are sung and said around the world and will not pass away.

## Recipes For This Week

(By Betty Barclay)

### MARSHMALLOW SALAD

- 4 oranges.
- 2 bananas.
- 1 cup marshmallows.
- 1/2 cup cream.
- Yolks of 2 eggs.
- 2 tablespoons sugar.
- 2 tablespoons lemon juice.
- 1 cup fresh grated coconut.

Cut oranges into sections, slice bananas and cut marshmallows into quarters. Mix with dressing made by scalding cream and thickening it carefully with egg yolks, beaten until light with sugar. Cool dressing and add lemon juice and a little sprinkling of salt before adding fruit. Serve with coconut.

### CARROT AND PEA DELIGHT

Boil two cups of cubed carrots until tender. Combine with one cup of cooked peas. Make a sauce of three tablespoons flour, three tablespoons butter or fat, one and a half cup milk, two teaspoons sugar, one-half teaspoon salt, and a dash of pepper. Add the cooked carrots and peas, reheat and serve very hot.

## Women and Peaces

Those millions of signatures taken to the naval conference in London, England, by the women of the world signifying their desire that war and vessels of war be abolished constitute a factor in the peace movement of the world events that it cannot be slighted by the delegates who govern its deliberations. It long has been said that women usually get what they want. In this case it is a question of their getting the abolishment of something they do not want.

She: "I heard someone yell 'War!' where are the fathers?"

He: "Oh, this case is between two picked teams."

One-fifth of the imports into New Zealand are from the United States.

## Rheumatism

Minard's Liniment  
Minard's Liniment  
Minard's Liniment

## WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, indigestion and biliousness surely follow. You must stimulate your liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, gently vegetable, free from all harmful and poisonous drugs, small, easy to swallow, and most forming tonic. They are not a purgative that cramps or pains, unpleasant after effect, and, on the contrary, a good tonic. All Druggists 25c and 75c red packages.

## Sensible People Do Not Envy Millionaires

Money Is Useful But No One Needs Excessive Amount

Statistics show that the United States has 40,000 millionaires, and one man in the billion-dollar class. It is not likely that any other country in the world can show so many millionaires, and it is just as likely that such should be the case. No man living and in his right mind needs more than a million dollars. That may strike some readers as an exaggerated statement, but it is not. He can't take a copper of it with him when he is through with this world, and the chances are that he will leave vast sums to his children, and money secured in that way has done more to spoil young folks than poverty ever did.

## Homestead Entries

Largest Number Of Entries Made In Alberta During Month Of January

Homestead entries in the four western provinces during the month of January numbered 663, as compared with 761 for the same month last year. The one province to show an increase was British Columbia, which doubled last year's quota, at 51, compared with 24. Manitoba recorded 29, compared with 42 last year; Saskatchewan 205, compared with 184, and Alberta 375, compared with 386.

## Fur Farming In Manitoba

Two Hundred and Thirty Farmers Now Operating In the Province

Fur farming in Manitoba is making big strides, the last available figures showing 230 farms in the province as compared with 12 in 1923, and two in 1920. In the last fiscal year, pelts to the value of \$1,286,537 were taken in the province, muskrats being the most numerous, numbering 248,094 with a value of \$285,204. The rest, in order of importance, were weasel, mink and wolf.

To the German scientist who has invented an honesty-testing machine we can only suggest that the patent idea before somebody steal it.

Persons are taking up the piano. 50 instruments having been imported into the country last year.

## High Grade Seed Grain

Wants Steps To Be Taken To Assist Grower Of Elite Seed

Urging the government to investigate the conditions under which elite seed is grown in the province and to take necessary steps to assist this kind of seed grower was the point of a resolution passed by the executive committee of the Moose Jaw Board of Trade.

"The resolution will be forwarded to the Boards of Trade in Regina, Saskatoon, Yorkton, Swift Current and Weyburn for consideration. The action follows an appeal by Major H. G. L. Strange, Fern, Alberta, who recently stated that such men as Dr. George Wheeler, Rothstein, and J. C. Mitchell, Dalmida, who grew elite seed, were being forced through financial hardship to abandon the work, which was so valuable to the province and the Dominion.

## An Interesting Fact

Something Everyone Does Not Know About "Nine Times"

Do you know your "nine times"? If you do, you will be able to realize the magic of the number 9. Just run through your multiplication table, and you will find that twice nine are eighteen, and eight and one are nine. Three nines are twenty-seven, and seven and nine are nine. Four nines are thirty-six, and three and six again make nine. Right to the end of the table you'll find that this rule holds good—one time anything gives an answer with figures that, in turn, add up to nine units which added together, give forty-five—and four and five make nine again.

## Saskatoon Egg Pool

Initial Payment Of 18 cents a Dozen On All Grades Of Commercial Eggs

Initial payment of 18 cents a dozen will be made on all grades of commercial eggs by the Saskatchewan Co-operative Poultry Producers Ltd., on the new egg pool. This price is lower than that paid last year on account of new legislation which compels a pool to make the initial payment 80 per cent. of the current value of firsts.

The pool will continue until the last Saturday in May, when a distribution of surplus profits will be made to the pool members. A new pool will then be started for the summer months.

## Eastern Fish For B.C.

Five million fish eggs of eastern whitefish have been received at the Dominion Hatchery at Nelson, B.C. Most of them will be placed in Kootenay Lake and the rest in Skeena Lake, this being the first time of any such introduction of whitefish in either lake.

## Shows Great Improvement

In eleven years the weight of the lightest Diesel engine has been reduced from about 65 pounds per horsepower to less than three pounds and the speed increased from about 750 revolutions a minute to more than 25,000.

## OPEN SORES

HEAL IN QUICKEST TIME KNOWN  
"I used to suffer from open sores on my legs and feet. I tried many treatments, but nothing helped. I then tried Zig-Zag Cigarette Papers and in a few days the sores were healed. I can now walk without pain."—John Smith, 421 Druggists.

## Some Interesting Exhibits

Remarkable Things Shown By Royal Society In London

One of the most interesting of the exhibits arranged by the Royal Society for its conversations in London, recently, was the Fabry-Perot Interferometer, lent by the National Physical Laboratory. By means of this apparatus measurements can be made up to a millionth part of an inch can be obtained with accuracy, says an overseas paper.

Another instrument shown was the Brown artificial horizon, named after its inventor, Mr. S. G. Brown. The principal feature of this invention is a gyroscope fitted with a mirror, which turning at the rate of six thousand revolutions a minute, remains in a horizontal position irrespective of any external movement. The instrument is especially intended for measuring altitudes of the sun at sea by sextants, or for obtaining the true horizontal when the weather conditions prevent the natural horizon from being seen.

Another invention which attracted much attention was the metachrome, an instrument with a wide range of use in decorative trades. A design, in outline, is projected on to a screen, and then, by means of colored lenses in the apparatus each separate element in the pattern can be colored, and the colors changed at will until the desired effect is obtained. A modification of this instrument is contemplated for application to theatrical stage scenery.

## When Politeness Is Costly

Politeness costs nothing, says an adage. But it costs a lot according to a big skyscraper elevator man, who says that when a man removes his hat in an elevator, it takes up the space of half a passenger, amounting to exact cost of current in a year to \$25,000.

Sundercock, on Saturday, April  
19, a daughter.

John Maxwell, of Calgary,  
visited with his sister and  
friend is over the holidays.

If you want to enjoy a good  
laugh, see "Strong Boy" at the  
Empress Theatre, this week.

Mr. and Mrs. G. S. Tucker  
and children, left by car for  
High Prairie, Alta., on Thurs-  
day.

Miss Vera Saunders, spent the  
Easter holidays at home here,  
and has returned to Calgary.

Miss Glimbeck, of Miss Al-  
ber, is the guest of Mrs. A. K. Mc-  
Neill.

Miss Grace Robertson left for  
Calgary, on Saturday, where  
she has secured employment.

"Strong Boy," a Fox comedy  
feature, is show that you are  
sure to enjoy is being shown at  
the Empress theatre this week.

Mrs. J. N. Anderson left last  
week for Calgary, as delegate  
from the local chapter to at-  
tend the I.O.E. Annual Meet-  
ing.

Mr. and Mrs. W. Aetion and  
Mr. and Mrs. R. Pool were  
visitors to Medicine Hat the  
first of the week.

Mr. and Mrs. Herb, McQueen,  
and children, of Madison, Sask.,  
were visitors of relatives here  
over the Easter holidays.

#### Say Election Date Definitely Fixed By Govt.

Ottawa, — Barring unlooked  
for developments in Parlia-  
ment, the House will be dis-  
solved in June and a general  
election held either on August  
26 or September 3.

While definite and authori-  
tative announcement is never  
made until the eve of dissolu-  
tion, the decision has been taken.  
Liberals members in many  
instances have returned to their  
homes for the Easter holi-  
days and have announced the  
proposed dates.

Objection to them has been  
raised on the grounds that they  
will throw the late campaign  
and polling into the active har-  
vest season. No time, however,  
meets the convenience of every-  
body. It is possible that if any  
change is made it will be to ad-  
vance the matter to July. The  
budget now appears to be the  
best.

#### There and There

"England is intensely interested  
in reciprocal trade possibilities  
with the Dominion. Although a  
multilateral trade has been car-  
ried on in the past, an even greater  
interest is being shown by well-es-  
tablished firms in Great Britain in  
Empire trade," said R. R. Gal-  
braith, British exporter, at Saint  
John recently on landing from S.S.  
Duchess of Athol at Saint John  
recently. "The commercial prob-  
lem in the British Isles is becom-  
ing increasingly conscious of a re-  
gion economic problem which  
both British and Canadian farm-  
ers are called upon to face," he  
added.

main issue upon which the  
Government will ask for sup-  
port. If, on presentation late  
this month, it awakens any  
widespread and favorable en-  
thusiasm, the Government may  
decide not to wait until its popu-  
larity wanes before the ap-  
peal is made.

The Finance Minister, while  
his colleagues are enjoying the  
vacation, is busily engaged in  
putting the finishing touches  
on his budget. Up to date the  
Prime Minister is the only one  
familiar with its general con-  
tents. After the recess the  
other Ministers will be per-  
mitted to review it in detail and  
make suggestions. Then, possibly,  
on May 1, Mr. Dunning will pre-  
sent it. That is his hope, pro-  
vided too many amendments  
are not determined upon when  
the full cabinet discusses it.

An interesting sidelight on  
political developments is now  
afforded by the Prime Minister  
of the Government's intention  
to adopt proportional rep-  
resentation in the cities. Con-  
servatives will make every an-  
tempt to block the move  
which, they claim, will give the  
Government at least five more  
metropolitan seats than they  
now hold.

#### R. M. Mantario

Minutes of meeting, April 7,  
1930, at N. W. 5-27-27 "S. 3. Eyre,  
Municipal Office. Present,

Hawtin—Minutes of previous  
meeting be confirmed.

Montgomery—Monthly state-  
ment accepted and filed.

Hawtin—That settlement be  
made with Canada Tractor and  
Equipment Co., for elevator  
grader by note for \$550, due  
Nov. 1st.

Betty—Estimates Clifton  
Bank S.D. \$931 be passed.

Dahl—That the Central Office  
make arrangements with one  
or more solicitors, who are ex-  
pert in Municipal law, so that  
the Councils of the various  
municipalities can write in to  
obtain rulings on matters which  
they consider expert advice  
would be advisable.

Hawtin—That as the present  
entrance to Culbertson elevator  
on the east side is altogether  
too narrow, the R.M. Mantario  
consider the purchase of addi-  
tional land to widen same  
should be made by the C.N.R.,  
if that is done the Municipality  
will grade the road to the ele-  
vator.

Austrum—That the Dept. of  
Highways be requested to com-  
plete and maintain road No. 44,  
starting southwest of Macarrie  
on road No. 45, continuing  
northerly on N. 14 to a point  
intersecting with No. 21, Al-  
sackton to Calgary highway  
—this being the most direct  
route from Calgary to Moose  
Jaw and Regina.

That the Secretary mail a  
copy of this resolution to the  
Town of Alaska and the fol-  
lowing municipalities: Royal  
Canadian No. 201; Newcombe  
No. 260; Ship Lake No. 259;  
Fairview No. 258; Monet No.  
257; King George No. 256; re-  
questing their support and sig-  
natures, and when those are  
obtained, that a copy be sent to  
E. S. Whitley, M.L.A. and to  
Hon. A. C. Stewart, Minister of  
Highways.

Amendment moved by Haw-  
tin—Resolutions to read start-  
ing at Alaska and ending at  
Macarrie, reversing the loca-  
tions for their local needs. Motion  
as amended, 4, yeas 3.

Austrum—That the Public  
Revenue Tax Act and the Wild  
Lands Tax Act be rescinded,  
and that the taxation of land  
be reserved to the municipali-  
ties for their local needs, to  
meet the ever-increasing ex-  
penses in respect to the care of  
the sick, and the increasing de-  
mands for more and better
